

We can't live our lives in
bubble wrap to stay safe

Taking care when reversing out of your driveway can help protect our community (and our posties).

There are many people who use the footpaths, like kids on bikes, dogs taking a stroll with their owner and our posties.

When you're reversing out of your driveway, keep a look out and always toot your horn – that way you'll let posties and others using the footpath know you're there.

We all have a role to play in helping to keep our community safe.

To find out how we're delivering a safer community visit auspost.com.au/safety

EVERYONE MATTERS
